

**MATH 2610**  
**Spring 2003**  
**Chad A. Mullikin**

**General Information :** Lectures will be held Tuesday and Thursday from 11:00am-12:15pm and Wednesday from 11:15am-12:05pm in Hardman Hall room 101. There will be some class time allowed for solving problems. However, it may be the case that this is not sufficient. If this is the case you are *encouraged* to come talk to me during my office hours. My office hours will be Tuesday and Thursday 12:15pm-1:15pm and Wednesday 1:30pm-2:30pm (or by appointment).

Office : Boyd 434E

**Textbooks :** The text that we will be using is Discrete Mathematics and Its Applications by Kenneth H. Rosen, 5<sup>th</sup> Edition.

**Homework and Tests :** It is critically important that a student of mathematics work problems. Simply following along in class is rarely sufficient. I will regularly assign problems that I feel are important. I will not grade the homework but we will have quizzes periodically that will be taken directly from the homework. The quizzes will only be announced the day they are to be taken and there will be no makeup quizzes offered. The lowest quiz grade will be dropped.

There will be three closed book in class exams as well as a cumulative final examination. The exams will be given roughly every four weeks.

*Any student with a valid excuse for missing an exam must obtain permission to reschedule well before the examination date. Please let me know of any conflicts immediately. No makeups will be given for quizzes.*

**Grading :**

	$90 \leq \mathbf{A}$
Tests :45%	$80 \leq \mathbf{B} < 90$
Quizzes :25%	$70 \leq \mathbf{C} < 80$
Final Exam :30%	$60 \leq \mathbf{D} < 70$
	$\mathbf{F} < 60$
